要点: 1. How do you learn English after class?

2. Tell us an experience about using good ways to learn English.

3. Do you have any good suggestions?

Different students have different ways to learn English after class. As for me, watching English movies helps me a lot with my spoken English.

I used to dislike my English class. Because of my poor pronunciation, I even didn't dare to answer the teacher's questions, either. Then I began to watch English movies after school. At first, I couldn't understand every word that the characters said, so I just listened for the key words. To have a better understanding of the movies, I sometimes looked up the words in the dictionary. Gradually, my speaking skill improved a lot.

I would like to share some learning methods with you, such as learning grammar by taking notes and memorizing new words by making word lists. What's more, don't give up when facing difficulties. I hope these suggestions can help you.
