Mount Kilimanjaro(乞力马扎罗山) is the highest mountain in Africa and one of the largest free-standing mountains in the world. And some people say it's the most beautiful place on the earth!

The mountain towers 15,000 feet above the plains. Mount Kilimanjaro is in Tanzania and it covers an area of 60 miles long and 40 miles wide. Kilimanjaro is an extinct volcano (死火山), with 3 peaks. Kibo is the highest one in the center. The first persons to reach the summit of the mountain was Hans Meyer in 1888, and Ludwig Purtscheller in 1889.

Because of Kilimanjaro's great height, the mountain influences (影响) its own weather. Winds incoming from the Indian Ocean are stopped upwards by the mountain and drop their moisture (湿气) as rain and snow. People have planted coffee, corn, and other crops on the lower slopes (斜坡).

Mount Kilimanjaro now attracts many thousands of climbers every year. Why do so many climbers risk their lives? One of the main reasons is because people want to challenge themselves in the face of difficulties. Sometimes humans can be stronger than the forces of nature. However, people around the world may feel the climate is getting warmer and warmer. Because the temperature has been
