You might not think much about where your garbage (垃圾) goes. But now you might want to know. On July 1, Shanghai created a new garbage-sorting policy (垃圾分类政策). People there need to put different kinds of garbage into different bins (垃圾箱).

Why is garbage sorting a big problem? Because too much garbage is bad for our soil, air and water these days. For example, if you put an old battery (电池) into the "harmful waste (垃圾)" bin, people can use it to make new batteries. But if you don't, the battery will end up somewhere else. Then, it will do bad to the environment.

Garbage sorting and recycling (回收) around the world

Germany (德国): There are big special boxes in supermarkets. You can put bottles (瓶子) in the boxes and get money. People like this because they can get money and protect (保护) the environment at the same time.

Japan (日本): A trash truck (垃圾车) comes to people's doors to pick up their garbage. It plays music when it's coming. There are eight or more kinds of garbage. If you sort any of them wrong, you will get a notice (通知) on your door.

61. When did Shanghai have the garbage-sorting policy?

62. Which bin should we put dog waste into?
